U.S. Army Corps of Engineers updates Missouri River information

ST. LOUIS – The U.S. Army Corps of Engineers St. Louis District has updated its flood fight web page with information regarding Missouri River flooding.

The Flood Fight page includes current projections regarding how water released from upstream dams may affect the St. Louis area.

Other information available includes levee status maps, links to updated river reports, contacts for other state and federal agencies, and weather and river forecasts from the National Weather Service. Information will be updated regularly.

St. Louis District's area of responsibility on the Missouri River begins near Washington, Mo. Federal levees upriver from Washington fall under the Corps' Kansas City and Omaha Districts. Links to these districts are provided.

The website address is <http://bit.ly/floodfight>, and is linked from the St. Louis District homepage (www.mvs.usace.army.mil) and Facebook (www.facebook.com/teamsaintlouis) sites.
